WOOD

Inspiration

Unique style in harmony with nature

Nothing is more soothing to our mind than the colours and textures taken from the world of nature. This is because what is best is reflected in nature. When creating the collection of wood-like tiles, we focused on the combination of beauty and uniqueness of wood with durability and strength of porcelain stoneware and clinker tiles. The new collections amaze with their colours and structure, creating a unique mood in every interior.

They are an exceptional material both for modern and classic concepts.

Thanks to the digital print technology, the fine grain texture of wood has been reflected with extraordinary craftsmanship. The tiles can successfully replace wood, while keeping their warm material for both modern and classic concepts.

Raw elegance

NICKWOOD

Inspiration for the creation of the Nickwood collection comes from the beauty of natural wood. Tiles with a matt surface and a non-uniform structure are perfect imitation, and a modern interpretation of raw wood boards.

The special abrasion marks on the surface are also very characteristic for rough timber. They add originality and a unique effect to any interior.

CONCRETE

Inspiration

Minimalism in a modern version

Concrete is currently one of the most popular materials used in interior design. It fits perfectly not only into lofts and industrial spaces, but also into cosy rooms when combined with warm decor and accessories.

It is always loved by fans of minimalism and appreciated by various interior designers. It attracts attention, evokes admiration and breaks free of the routine, giving a wide range of design possibilities.

Raw mastery

SOFTCEMENT

Fans of minimalistic interiors will greatly enjoy the structure of concrete that inspired the Softcement tile collection. An interesting structure along with patchwork accents, is a mix of several interior design trends, that create an impressive and consistent composition in the collection.

The imitation of concrete in three shades of grey, combined with very attractive decor and tiles with 3D-print structure, adds a new and interesting character to any room. The Softcement collection is recommended to customers that would like to capture the energy and harmony of subtle and consistent interiors.

The matt or polished surface of porcelain stoneware tiles, with their delicate structure, allows not only for their arrangement on large surfaces such as walls and floors, but also for the creation of distinctive patchwork decorations in specific areas.

The combination of regular tiles with decors from the Softcement collection looks great in modern bathrooms and kitchens.
