**PARADYZ** 

## Dear Customers,

Ceramika Paradyż, a leading Polish manufacturer of ceramic tiles, has been delivering outstanding products inspired by the style of our valued Customers for 30 years. Our products enable them to create the interiors of their dreams, filled with love, positive energy, and happiness – places where they will feel comfortable for many years to come. With the support of state-of-the-art technologies, each day, our team of talented and committed staff strive to deliver the highest-quality products that are in line with the latest design trends.

The catalogue you hold in your hands encompasses hundreds of inspirations that will impel you to create original interiors in a broad range of different styles – from the classical, minimalist and eco; to the richly decorated and glamorous ones. We expanded our COLOUR palette by including subtle pastel shades, which will emphasise the mild COLOURs of your interiors instead of dominating them. What is more, you can also find a wide variety of interesting patterns – clear and sharp geometric motifs, breath-taking designs and even original 3D structures.

We hope that you will soon join the community of hundreds of thousands of satisfied Customers from all over the world who decided to choose our products and invited them into their unique spaces. Embark on an unforgettable journey that will lead you from the most beautiful inspirations, through design trends towards exceptional and outstanding interiors.

Ceramika Paradyż Team

Interior design involves the search for unusual solutions which give a room a unique flair. But the character of a house is formed not only from its furniture and furnishings, but most of all by the people who live there. Every room should reflect the passions, dreams, and tastes of its occupants. An interesting way to create individualised design elements is printing on glass. The combination of this material with an individual design makes glass graphics perfect for both classic and modern interiors.

A variety of designs can be applied to the glass, depending on the style of the room and its function.

A perfect match for a modern living room is a black and white cityscape or portrait of a celebrity, while a kitchen will be enhanced by an illustration of an appetising dish or composition of herbs. It's important that the picture should be as universal as possible: the use of classical motifs and restrained colours means that the decoration will MATCH the room even if the interior design changes.

If you don't find a design that suits you from among our ready-made solutions, we can create a custom design, as printing on glass allows unique, individual graphics to be created. It could be a family photo, your own graphic composition, or a photo of a place which brings back beautiful memories. The children's room is the perfect place for motifs from favourite fairytales, or can even feature a graphic illustration of the child itself.

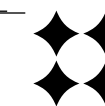

An ideal solution for busy, organised people who value order and tidiness is a noticeboard. By using special markers, the glass printing can be used to make shopping lists, assign household chores, or leave a message for the rest of the family...

### Applications of printing on glass:

- ◆ A picture that can be hung on every wall of the house, including in the bathroom
- ◆ Large-format panels can be used for walls of shower stalls
- ◆ A picture can be used as a protective coating for kitchen countertops
- ◆ Wall decoration placed behind the headboard of a bed
- ◆ Noticeboard for members of the household

SARIGO BEIGE 40×40

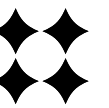

# TECHNOLOGICAL CHARTS

Tiles are produced in compliance with EN 14411 norm, however production of special ceramic products is based on compliance with internal Ceramika Paradyż Sp. z o. o. norm. Special ceramic products are: skirting boards, cut out inserts, cigars, londons, raccordos, cut out strips glued on mesh, stair treads, mosaics.  
Dry pressed ceramic tiles and special ceramic products with low water absorption level  $E_w \leq 0,5\%$  – Group BI<sub>1</sub>.

Requirements for dry-pressed ceramic tiles, with low water absorbance, BI <sub>1</sub> Group ( $E_w \leq 0.5\%$ ) UGL and GL					
Properties	Requirements for the nominal size <i>N</i>			Research method	
	7 cm ≤ <i>N</i> < 15 cm (mm)	(%)	<i>N</i> ≥ 15 cm (mm)		
<b>SURFACE MEASUREMENTS AND QUALITY</b>					
<b>Length and width</b>					
Acceptable deviation of the average measurement of each tile (2 or 4 sides) from the working measurement (W).	± 0,9 mm	± 0,6 %	± 2,0 mm	EN ISO 10545-2	
<b>Thickness</b>					
a) Thickness should be determined	Declared thickness				
b) Acceptable deviation of the average thickness of each tile from the thickness of the working measurement	± 0,5 mm	± 5 %	± 0,5 mm		
<b>Side curvature</b> ; visible surfaces					
Acceptable deviation from a straight line, in reference to the relevant working measurements.	± 0,75 mm	± 0,5 %	± 1,5 mm		
<b>Rectangularity</b>					
Maximum acceptable deviation from the right angle, in reference to the relevant working measurements.	± 0,75 mm	± 0,5 %	± 2,0 mm		
<b>Surface flatness</b>					
Maximum acceptable deviation from flatness:					
a) Curvature of the middle, in reference to the diagonal calculated on the basis of the working measurements;	± 0,75 mm	± 0,5 %	± 2,0 mm		
b) Curvature of the sides, in reference to the relevant working measurements;	± 0,75 mm	± 0,5 %	± 2,0 mm		
c) Distortion in reference to the diagonal calculated on the basis of the working measurements.	± 0,75 mm	± 0,5 %	± 2,0 mm		
<b>Surface quality</b>					
At least 95 % of tiles should not have visible defects that would cause visible deterioration of tiles' appearance on the considerable part of the surface.					
<b>PHYSICAL PROPERTIES</b>					
<b>Water absorbance</b> ( in % of mass)					
$E_w \leq 0.5\%$ For a single tile maximum 0.6 %					
<b>EN ISO 10545-3</b>					
<b>Breaking force for:</b>					
a) Thickness ≥ 7.5 mm	No less than 1300 N			EN ISO 10545-4	
b) Thickness < 7.5 mm	No less than 700 N				
Minimum 35 N/mm <sup>2</sup>					
For a single tile minimum 32 N/mm <sup>2</sup>					
<b>Resistance to bending</b>					
Research method used					
<b>CEN/TS 16165</b>					
<b>Anti-slip properties [R]</b>					
Frost resistant					
<b>EN ISO 10545-12</b>					
<b>Frost resistance</b>					
Research method used					
<b>EN ISO 10545-9</b>					
<b>Thermal shock resistance</b>					
Maximum 175 mm <sup>3</sup>					
<b>EN ISO 10545-6</b>					
<b>Resistance to deep abrasion of non-glazed tiles: volume of old MATterial</b>					
Non-abrasion category and number of spins					
<b>EN ISO 10545-7</b>					
<b>Resistance to surface abrasion of glazed floor tiles</b>					
<b>Resistance to stains for:</b>					
a) Glazed tiles	Minimum Category 3			EN ISO 10545-14	
b) Non-glazed tiles	Research method used				
<b>Resistance to household chemical substances and salts used in swimming pools</b>					
Minimum Category B					
<b>EN ISO 10545-13</b>					

# TECHNOLOGICAL CHARTS

Tiles are produced in compliance with EN 14411 norm, however production of special ceramic products is based on compliance with internal Ceramika Paradyż Sp. z o. o. norm. Special ceramic products are: skirting boards, cut out inserts, cigars, londons, raccordos, cut out strips glued on mesh, stair treads, mosaics.

Requirements for dry-pressed ceramic tiles, B III Group ( $E_w > 10\%$ )
